DETAILED ACTION

Claims 1-10 and 12-15 are pending in this application.

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on November 17, 2006 was noted and the submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner has considered the information disclosure statement.

Action Summary

2. The rejection of claims 1-15 under 35 U.S.C. 112, first paragraph, is hereby withdrawn in view of applicants' arguments and amendment.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Art Unit: 1616

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-10 and 12-15 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 20 of copending Application No. 11/091,649. Although the conflicting claims are not identical, they are not patentably distinct from each other because both copending applications are directed towards a composition comprising a carbohydrate encapsulated nanoparticle, wherein, the nanoparticle comprises a core metallic nanoparticles and a plurality of carbohydrate molecules. The difference between the two is that the instant invention ('076) does not contain the matrix material of '649. The composition of the instant invention ('076) comprises open language and as such does not exclude additional components and is thus obvious. Although claim 20 of '649 is silent with respect to examples of the core metallic nanoparticle and the carbohydrate, paragraphs [0066 and 0078] of the '649 specification teaches examples of the metallic core as gold and the carbohydrate as mannose, glucose or galactose and is thus obvious.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

4. Claims 1-10 and 12-15 are rejected.
